

Microbial Contamination Test Kit

For Petroleum Products

Uncontrolled microbial contamination in fuels and fuel systems is a costly problem. From crude oil production to terminal or transportation operations to consumer end use, diligent monitoring for microbes is essential to ensuring fuel quality and performance.

Conostan, the brand you trust most for oil reference materials, is now paired with our highly regarded, easy-to-use microbial detection kit, that is ideal for monitoring petroleum products.

- ▶ The kit includes 12 ready-to-use test media bottles.
- ▶ Simple color indicator for the presence of the two main groups of microorganisms found in petroleum products: bacteria and fungi.
- ▶ Suitable for most petroleum products including diesel, jet fuel, and hydraulic fluid.

Description	Kit Contents	Part Number	Ordering Number
Conostan Microbial Contamination Test Kit	12 tests	B9000	NEB9000
