

Press Release – Expanding our *DigiPREP* Digestions System Product Line

Montreal (March 2009) – **SCP SCIENCE** a leading manufacturer of instruments and supplies for atomic spectroscopy laboratories, expands their *DigiPREP* Digestion Systems product line to include three new products.

First is a color graphic Touch Screen Controller designed to graphically display, in real time, actual digestion temperatures vs pre-programmed temperatures.

Second, 100 ml tube capacity *DigiPREP* graphite block digestion systems for large size samples and evaporation applications. These blocks come in three different sample capacities to address workloads from small to large.

Finally, a *DigiPREP* Mini Digestion System enabling nine samples to be digested simultaneously using the **SCP SCIENCE** disposable, screw cap, 50 ml, flat bottom *DigiTUBES*. The Mini is perfect for labs with low sample loads.

All new products are on display at PITTCON in Booth 4020.

About SCP SCIENCE – CONOSTAN:

SCP SCIENCE – Headquarters is located in Baie D’Urfé, Québec, Canada on the western portion of the island on Montreal. Distribution and sales offices are located in Champlain, NY serving the USA; in the Courtaboeuf suburb of Paris, France serving the European Union; and in Beijing, China serving Asia. All South America sales and services are offered from the Baie D’Urfé office.
