

## **PlasmaFLOW Concentric Nebulizers for ICP Spectrometers by SCP SCIENCE**

**FOR IMMEDIATE RELEASE:**

**(Montreal, October 17<sup>th</sup>, 2017) - SCP SCIENCE**, a manufacturer of analytical instruments, supplies and standards to the atomic spectroscopy market introduces its newest product line: *PlasmaFLOW* Concentric Nebulizers for ICP / ICP-MS sample introduction. Along with Concentric Nebulizers, the *PlasmaFLOW* line of products consists of PVC flared and non-flared peristaltic pump tubing; Mini X-Flow nebulizer; spray chambers; torches; and ICP-MS sampler/skimmer cones.

Concentric glass and quartz nebulizers have been the cornerstone for sample introduction in ICP spectroscopy for over three decades. **SCP SCIENCE** expands their *PlasmaFLOW* line by introducing a range of glass and quartz concentric nebulizers for trace metal analysis.

**SCP SCIENCE** manufactures Type “A” (General Purpose), Type “C” (High Solids) and Type “K” (Argon Low-Flow) nebulizers. Each and every nebulizer is tested by the Quality Control Department and its unique sample uptake (ml/min) as well as its argon pressure (psi) is provided, in order to have a consistent sample introduction nebulizer.

### **LIMITED TIME OFFER**

**FREE** pack of *PlasmaFLOW* PVC pump tubing or **FREE** ICP Standard\* (single element, 1,000 ppm, 2 x 25 ml) with the purchase of a *PlasmaFLOW* product; including nebulizers, spray chambers, torches and ICP-MS cones (sampler and skimmer). \*The following elements are excluded from all special offers: Be, Sc, Ru, Rh, Pd, Re, Os, Ir, Pt, Au, Tm, Lu.

**More about SCP SCIENCE:**

Founded in 1980, **SCP SCIENCE** is a privately owned manufacturer of analytical instruments, supplies, standards, reagents, and certified reference materials for inorganic chemical laboratories.
