

### SECTION 1 Identification of Substance/ Preparation and Company/ Undertaking

**Product Name:** PlasmaCAL Single element calibration standard for ICP-AES and ICP-MS

**Matrix:** 4% nitric acid

containing the following element:

10000 µg/ml: As

**Catalogue Number:** 140-061-33x

<b>Supplier:</b>	SCP SCIENCE	SCP SCIENCE	SCP SCIENCE
<b>Address:</b>	21 800 Clark-Graham Baie d'Urfé, Québec Canada H9X 4B6	12 Avenue du Québec Bâtiment I-2 SILIC 642 91965 Courtaboeuf, France	348 Route 11 Champlain, NY 12919-4816
<b>Phone Number:</b>	(514) 457-0701	33-01-69-18-71-17	(800) 361-6820
<b>Fax Number:</b>	(514) 457-4499	33-01-60-92-05-67	(800) 253-5549

In the event of a transport emergency, call Chemtrec (24 h): 1-703-527-3887

In the event of medical emergency, call your local poison centre or equivalent.

### SECTION 2 Hazards Identification

#### Emergency Overview

#### GHS

<b>Classification:</b>	(Nitric Acid) Corrosive- Category 1B (Arsenic (V) oxide) Carcinogen- Category 1A	<b>Pictograms:</b>	The image shows two GHS pictograms side-by-side. The first is the Corrosive (C) pictogram, which depicts two test tubes dripping liquid onto a hand and a metal surface. The second is the Carcinogen (Cn) pictogram, which shows a silhouette of a person with a starburst on their chest.
------------------------	---	--------------------	---

**Signal Word:** Danger Corrosive

#### Hazard Statements

**H314:** Causes severe skin burns and eye damage.

**H350:** May cause cancer.

#### Precautionary Statements

**P201:** Obtain special instructions before use.

**P202:** Do not handle until all safety precautions have been read and understood.

**P260:** Do not breathe fumes/gas/mist/vapors/spray.

**P264:** Wash thoroughly after handling.

**P280:** Wear protective gloves/protective clothing/eye protection/face protection.

**P301+P330+P331:** IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

**P303+P361+P353:** IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.

**P304+P340+P310:** IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Immediately call a POISON CENTER or doctor/physician.

**P305+P351+P338:** IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

**P308+P313:** IF exposed or concerned: Get medical advice/attention.

**P405:** Store locked up.

**P501:** Dispose of contents/container according to federal, regional and local government requirements.

### SECTION 3 Composition and Information on Ingredients

CAS No.	Chemical Name	Percent	EC Number
7697-37-2	Nitric acid	4%	231-714-2
12044-50-7	Arsenic (V) oxide	1.7%	---
7732-18-5	Water	95%	231-791-2

The preparation also contains water and trace amounts (< 0.01%) of various metals and metallic salts.

### SECTION 4 First Aid Measures

#### In case of contact:

<b>Eye:</b>	Immediately flush eyes with plenty of water for at least 15 minutes, holding the eyelids open. Neutral saline may be used as soon as it is available. Do NOT interrupt flushing. If irritation persists, repeat flushing. Get medical aid immediately.
<b>Skin:</b>	Immediately flush skin with plenty of water for at least 30 minutes while removing contaminated clothing and shoes. Do NOT interrupt flushing. Get medical aid immediately.
<b>Ingestion:</b>	For a precaution: Never give anything by mouth to an unconscious person. If victim is conscious and alert, give 2-4 cupfuls of milk or water. Do NOT induce vomiting. Get medical aid immediately.
<b>Inhalation:</b>	Take proper precautions to ensure your own safety before attempting rescue (e.g., wear appropriate protective equipment). If breathed in, move person into fresh air immediately. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical aid immediately.

**Notes to Physician/Doctor:** Treat symptomatically and supportively.

### SECTION 5 Fire-fighting Measures

#### Fire Hazard Summary:

Product does not burn. May react with many metals. Generates heat when mixed with water. Firefighters should wear self-contained respirator and full protective gear. During a fire, irritating and toxic gases may be generated by thermal decomposition or combustion.

<b>Extinguishing Media:</b>	Whichever is most appropriate for the surrounding fire. Use flooding quantities of water spray or fog.
<b>Extinguishing Media to be Avoided:</b>	DO NOT use dry chemical powders containing sodium bicarbonate, potassium bicarbonate, sodium carbonate, calcium carbonate, ammonium phosphate, or ammonium sulfate. Nitric acid may react violently with these extinguishing agents.
<b>Combustion and Thermal Decomposition Products:</b>	Nitrogen oxides.

#### NATIONAL FIRE PROTECTION ASSOCIATION (NFPA) HAZARD IDENTIFICATION

Health:	3 – Short exposure could cause serious temporary or moderate residual injury.
Flammability:	0
Reactivity:	0
Special Hazard:	

### SECTION 6 Accidental Release Measures

#### Spill Precautions:

Personal precautions: Use personal protective equipment.

Ensure adequate ventilation. Evacuate personnel to safe areas.

**Clean-up:**

SMALL SPILLS: Soak up spill with absorbent material which does not react with spilled chemical. Put material in suitable, covered, labeled containers. Flush area with large quantities of water. Contaminated absorbent material will pose the same hazards as the spilled product.

LARGE SPILLS: Evacuate area. Contact fire and emergency services and supplier for advice.

## SECTION 7 Handling and Storage

**Handling:**

Use only with adequate ventilation and/or personal protective equipment. Wash thoroughly after using. Avoid contact with skin and eyes. Avoid generating vapors or mists. Avoid contact with all incompatible materials. When diluting, always add acid to cold water slowly and in small amounts. Never use hot water and never add water to the acid.

**Storage:**

Store in a tightly closed container in a cool, well ventilated and dry area. Store away from incompatible materials, heated areas, sparks, and flames. Do not store in metal or glass containers.

**Additional Information:**

The mixture is intended for use in a laboratory. The mixture as supplied is stable under normal laboratory conditions.

## SECTION 8 Exposure Controls and Personal Protection

**EXPOSURE GUIDELINES**

NIOSH:	2 ppm TWA (5 mg/m <sup>3</sup> TWA); 4 ppm STEL (10 mg/m <sup>3</sup> STEL)
ACGIH:	2 ppm TWA (5.2 mg/m <sup>3</sup> TWA); 4 ppm STEL (10 mg/m <sup>3</sup> STEL)
OSHA Final PEL:	2 ppm TWA (5 mg/m <sup>3</sup> TWA)

**Preventive Measures:**

<b>Eye / Face protection:</b>	Eye-wash station in proximity. Avoid contact with skin and eyes.
<b>Skin protection:</b>	Wear suitable clothing and gloves. Refer to OSHA's protection regulations in 29 CFR 1910.133 or European Standard EN166.
<b>Inhalation / Ventilation:</b>	Use in a chemical fume hood.
<b>Personal Hygiene:</b>	Do not eat or drink in work areas. Wash hands thoroughly after handling this material. Maintain good housekeeping. Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.
<b>Appropriate Engineering Controls:</b>	Use laboratory fumehoods in case of insufficient ventilation.

## SECTION 9 Physical and Chemical Properties

<b>Form:</b>	Aqueous Liquid	<b>Melting/Freezing Point:</b>	c. -7 °C
<b>Color:</b>	Colorless	<b>Boiling Point:</b>	c. 102 °C
<b>Odor:</b>	Odorless		
<b>Odor Threshold:</b>		<b>pH:</b>	< 1.0

<b>Solubility:</b>	soluble in water	<b>Density:</b> (@ 20 °C)	c. 1.02 g/mL
<b>Vapor Density:</b>	Not Available	<b>Viscosity:</b> (@ 20 °C)	Not Available

## SECTION 10 Stability and Reactivity

<b>Chemical stability:</b>	Stable at room temperature and conditions of use.
<b>Incompatible Materials:</b>	Reacts with bases.
<b>Conditions to avoid:</b>	High temperatures.
<b>Hazardous Decomposition Products:</b>	Nitrogen oxides.
<b>Hazardous Polymerization:</b>	None reported.

## SECTION 11 Toxicological Information

### Potential Health Effects

<b>Eye:</b>	Eye irritation with possible burns.
<b>Skin:</b>	Skin irritation with possible burns.
<b>Ingestion:</b>	Harmful or fatal if ingested.
<b>Inhalation:</b>	None expected.

### Effects of Short-Term (Acute) Exposure

<b>LD50/LC50:</b>	Fatal dose for humans: 5-10 ml conc. HNO <sub>3</sub> <b>LC50</b> (lethal concentration, 50% kill) Inhalation, rat – 260 mg/m <sup>3</sup> /30M
	A component of the preparation, arsenic (V) oxide is toxic.

### Effects of Long-Term (Chronic) Exposure

<b>Respiratory or skin sensitization:</b>	No information found.
<b>Germ Cell Mutagenicity:</b>	No component of this product at levels greater than 0.1% is classified as a mutagen.
<b>Reproductive Toxicity:</b>	No component of this product at levels greater than 0.1% is classified for reproductive toxicity.
<b>STOT- Single exposure</b>	Causes severe skin burns and eye damage (Nitric Acid).
<b>STOT- Repeated exposure</b>	No definitive information available on target organs toxicity, repeated exposure.
<b>Aspiration Hazard:</b>	No information found.
<b>Carcinogenicity:</b>	Not listed as a carcinogen by NTP, or CA Prop 65.
	Component(s) of this preparation listed in the National Toxicology Program ARC (12th Report on carcinogens): Arsenic Compounds, Inorganic.
	Component(s) of this preparation appearing in the list (June 22, 2012) of chemicals known to the state of California to cause cancer or reproductive toxicity (California Proposition 65): Arsenic (Inorganic arsenic compounds).

	Arsenic (V) oxide may have adverse effects on many systems of the body, including peripheral nervous system, skin, and others.
<b>Signs and symptoms of exposure:</b>	
<b>Skin:</b>	Dilute solutions of nitric acid produced mild epidermal irritation and can harden the epithelium without producing corrosion seen after contact with more concentrated solutions.
<b>Eye:</b>	In contact with the eyes, nitric acid produced severe burns. Depending on the concentration and duration of contact with the eye, these burns may result in adhesions between tarsal and bulbar conjunctivae, permanent corneal opacification, and visual impairment leading to blindness.
<b>Ingestion:</b>	Symptoms from swallowing nitric acid may include: severe abdominal pain, burns to skin or mouth, fever, severe mouth pain, rapid drop in blood pressure, throat swelling (which leads to breathing difficulty), severe throat pain, and bloody vomiting.
<b>Inhalation:</b>	Symptoms from breathing in (inhaling) concentrated nitric acid may include: bluish colored lips and fingernails, chest tightness, choking, coughing, coughing up blood, dizziness, low blood pressure, rapid pulse, shortness of breath, and weakness.

## SECTION 12 Ecological Information

**Eco- toxicity:** no information about this preparation is available.

**Mobility in soil:** no information about this preparation is available.

**Persistence and degradability:** no information about this preparation is available.

**Bioaccumulative potential:** no information about this preparation is available.

## SECTION 13 Disposal Considerations

### Product disposal:

The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material, run off and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional and local authority requirements. Contact a licensed professional waste disposal service to dispose of this material.

Review federal, provincial and local government requirements prior to disposal. Store material for disposal as indicated in Storage Conditions.

**Contaminated packaging:** Dispose of as unused product.

## SECTION 14 Transport Information

### IDMG (sea):

<b>UN-Number:</b>	3264	<b>Class:</b>	8
<b>Packing group:</b>	III		
<b>Proper shipping name:</b>	Corrosive liquid, acidic, inorganic, n.o.s. (nitric acid 4%)		
<b>Marine pollutant:</b>	No		
<b>ADR/DOT (road):</b>			
<b>UN-Number:</b>	1760	<b>Class:</b>	8
<b>Packing group:</b>	III		
<b>Proper shipping name:</b>	Corrosive liquid, acidic, inorganic, n.o.s. (nitric acid 4%)		
<b>Marine pollutant:</b>	No		

<b>ICAO/IATA (air):</b>			
<b>UN-Number:</b>	3264	<b>Class:</b>	8
<b>Packing group:</b>	III		
<b>Proper shipping name:</b>	Corrosive liquid, acidic, inorganic, n.o.s. (nitric acid 4%)		
<b>Marine pollutant:</b>	No		

<b>SECTION 15</b>	<b>Regulatory Information</b>
-------------------	-------------------------------

<b>US Federal:</b>	
<b>TSCA</b>	Listed on the TSCA Inventory (Nitric Acid 70%).
<b>US State:</b>	
<b>California Prop. 65</b>	See Section 11.
<b>Canada</b>	
<b>WHMIS Classifications:</b>	
	E – Corrosive material D2B – Toxic materials causing other toxic effects.

<b>EU</b>	
<b>Classifications:</b>	T- Toxic, Xi - Irritant
<b>Risk Phrase(s):</b>	R 34- Causes burns. R 36/ 38- Irritating to eyes and skin. R45- May cause cancer.
<b>Safety Phrase(s):</b>	S1/ 2- Keep locked up and out of the reach of children. S26- In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. S36/ 37/ 39- Wear suitable protective clothing, gloves and eye and face protection. S45- In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible).

<b>SECTION 16</b>	<b>Other Information</b>
-------------------	--------------------------

<b>Revised:</b>	March 2, 2015
<b>Date of previous revision (s):</b>	August 20, 2013
<b>Details of revision (s):</b>	<b>Section 11, 15.</b>
